

PUBLIC NOTICE

Possible exposure to measles in Montreal

April 28, 2026

A case of measles

A case of measles in a person living outside Montréal was reported to the Montreal Regional Public Health Department on April 25, 2026. This person visited certain places in Montreal while contagious.

Places, dates and times of possible exposure to measles

People who went to the following places on the days and times listed below may have been exposed to the measles virus:

Exposure sites	Dates and times of exposure	Watch for symptoms until
Golf intérieur Le Birdie Rosemont, 2520 Bd Saint-Joseph E #204, Montreal, Quebec H1Y 2A2	April 17, 2026 between 5:30 pm and 11:30 pm	May 8, 2026
Casino de Montréal, 1 Ave du Casino, Montreal, Quebec, H3C 1A9	April 18, 2026 between midnight and 5:30 am	May 9, 2026
Suites Saint-François-Xavier (SFX Old port) 438 rue Saint-François-Xavier, Montreal, Quebec, H2Y 2T3	April 17, 2026 Between 10:00 pm and 11:59 pm	May 8, 2026
	April 18, 2026 between midnight and 1:00 am	May 9, 2026
	April 18, 2026 Between 4:00 am and noon	May 9, 2026

The full list of exposure sites in the province, including the ones outside Montréal, is available at <https://www.quebec.ca/en/health/health-issues/a-z/measles/measles-outbreak>.

It is advisable to check the site regularly, as the information may change according to the results of surveys.

Recommendations for people who went to those sites on the dates and times listed in the *Sites, dates and times of exposure* table

Public health recommends that anyone who went to those places on the dates and times indicated in the table should **check if they are protected against measles**.

If you would like **information about your vaccination against measles, you can:**

- Contact your [CLSC](#)
- Contact your [local point of service](#)
- Call 1-877-644-4545

In Québec, a person is protected if:

Year of birth	Number of doses of vaccine* needed to be considered protected against measles
Person born after 1980	Has received 2 doses of vaccine (starting at 12 months of age)
Person born between 1970 and 1979	Has received 1 dose of vaccine (2 doses for healthcare workers)
Person born before 1970	No vaccine necessary
At any age	A person who has had measles and has proof of it (medical certificate or blood test) does not need to be vaccinated.

* Examples of brand names of measles vaccines: Priorix, Priorix-Tetra, MMR II, ProQuad, Attenuvax, Moru-Viraten, Rimevax, RRO, Trivirix, Vaccin antirougeoleux.

If you're protected against measles

It is very unlikely that you will get the disease. However, as a precaution, **watch for symptoms of measles** until the date indicated in the *Sites, dates and times of exposure* table (the one that corresponds with your situation).

To know the symptoms of measles and what to do if you have symptoms, visit the [Measles](#) page.

If you're not protected against measles

It is recommended that you:

- **Isolate at home** until the 14th day (inclusively) after your last contact with measles.
- Avoid all contact with
 - unvaccinated people (e.g. babies under 1 year of age)
 - people with weakened immune systems.

If you have been contacted by public health, follow the personalized instructions that were provided to you.

- **Monitor yourself for symptoms of measles** until the date indicated in the *Places, Dates, and Times of Exposure* table.
- To learn about measles symptoms and what to do if they appear, consult the [Measles](#) page.
- **Make an appointment:** to receive the measles vaccine once your isolation period is over (i.e., 14 days after your last exposure to a location).

What to do if you have symptoms of measles

If you think you have measles, stay home and call Info Santé at 811.

If you have to go to a clinic or hospital:

- Call before you go to let them know you're on your way. Wear a mask when you leave your home.
- When you get to the clinic or hospital, immediately tell a staff member that you think you have measles.

You can book an appointment to get vaccinated:

- By calling 1-877-644-4545
- On the [Cllic Santé](#) website.

The measles vaccine is free in all local service centres. The vaccine is also free for people who do not have a RAMQ card.

Recommendations for people living in Montréal who have not been exposed to measles

In the context of increased transmission of measles in North America, public health recommends that everyone **checks if they are protected against measles**.

If you would like information about your vaccination status and protection against measles

- Contact your [CLSC](#)
- Contact your [local point of service](#)
- Call 1-877-644-4545

If you're not protected against measles

It is recommended that you get vaccinated. Measles vaccination is free, even for individuals without a RAMQ card. The measles vaccination program has existed in Canada for over 50 years. The measles vaccine is safe and highly effective.

You can book an appointment to get vaccinated:

- By calling 1-877-644-4545
- On the [Cllic Santé](#) site.

The measles vaccine is free in all local service centres.

Important: If a person received a dose of the measles vaccine before 12 months of age, two additional doses are required to be protected. Starting at 12 months, a child's immune system is mature enough to provide long-lasting protection.

What is measles?

Measles is an infection that spreads through the air or direct contact. In unvaccinated people, it can cause complications such as

- pneumonia
- loss of sight or hearing
- brain infection

Approximately one in 3,000 children who contract measles die from it.

There is no treatment for measles. Vaccination is very effective in preventing the disease and its complications.

The vaccination program protects both yourself and others.
